

# Cuff Pressure Control Gauges

For inflating/deflating, controlling and monitoring cuff pressures on ET Tubes, VBM Laryngeal Tubes (King LT) or LMA which are with high volume, low pressure cuffs.

**Latex Free!**

- Reduces the risk of pressure necrosis and mucosal ischemia.
- The risk of aspiration with the possibility of pneumonia can be avoided.
- Ergonomic one-hand operation.

Complete with 100cm long connecting tubing (#54-05-112).

<b>REF.</b>	<b>Product Description</b>	
54-07-000 Ø 68 mm scale	<b>Universal</b> Cuff Pressure Gauge, pressure up to 120cm H <sub>2</sub> O, scale with idea ranges~ for ET Tube (22-32 cm H <sub>2</sub> O) for Supraglottic Airway (32-60 cm H <sub>2</sub> O)	
54-02-001 Ø 50 mm scale	<b>Pediatric</b> Cuff Pressure Gauge, release valve allows sensitive adjustment of the desired cuff pressure. pressure up to 60cm H <sub>2</sub> O, with recommended idea range from 5 to 15cm H <sub>2</sub> O printing on face plate.	
54-03-001 Ø 50 mm scale	<b>Sensitive</b> Cuff Pressure Gauge, release valve allows sensitive adjustment of the desired cuff pressure. pressure up to 120cm H <sub>2</sub> O, with recommended idea range from 22 to 32cm H <sub>2</sub> O printing on face plate.	
54-04-000 Ø 50 mm scale	<b>Pocket</b> Cuff Pressure Gauge pressure up to 120cm H <sub>2</sub> O, with recommended idea range from 22 to 32cm H <sub>2</sub> O printing on face plate.	

**Connecting tube**, for Cuff Pressure Control Gauges

Material: PVC, for single use, non sterile  
with female Luer Lock and male Luer
